PROFESSIONAL SUMMARY

High-performing **Information Technology student** with specialized competencies in **Python, SQL, AWS, and Big Data processing**. Proven expertise in evaluating complex LLM prompt-response pairs, fine-tuning dataset accuracy, and architecting scalable cloud-native applications. Strong analytical foundation in RESTful API integration, system design basics, and data visualization. Seeking an entry-level role in **Software Development, Cloud Engineering, or Data Analytics**.

EDUCATION

Vishnu Institute of Technology – Bhimavaram, AP

2024 – 2027

Bachelor of Technology in Information Technology (Lateral Entry)

Sri Vasavi Engineering College – Tadepalligudem, AP

2020 – 2023

Diploma in Electrical & Electronics Engineering (EEE)

PROFESSIONAL EXPERIENCE

AI Data & Model Evaluation Contributor – **Outlier** (Remote)

2025 – Present

- **LLM Benchmark & Fine-Tuning:** Evaluate and audit **1,500+ LLM prompt-response samples weekly** to improve model accuracy across Reinforcement Learning from Human Feedback (RLHF) pipelines.
- **Quality Assurance & Hallucination Flagging:** Consistently maintain a **97%+ accuracy rate**, identifying edge-case logic failures, factual errors, and hallucination patterns in dynamic evaluation workflows.
- **Domain Adaptability:** Mastered and successfully executed **8+ distinct evaluation frameworks** spanning code validation, reasoning analysis, and natural language understanding.

KEY PROJECTS

Cloud-Based Movie Streaming Architecture | **AWS, Cloud Security, CDN**

- Engineered a scalable, secure, and cost-effective media distribution infrastructure on **AWS** leveraging core cloud architectural best practices.
- Configured **EC2** for dynamic compute scaling, **S3** with IAM bucket policies for media storage, **RDS (MySQL)** for user/metadata management, and **CloudFront CDN** for low-latency streaming.

Big Data Analytics & Web Log Pipeline | **Apache Spark, Data Engineering**

- Designed end-to-end Big Data ETL pipelines to parse and transform large-scale unstructured web server log datasets using **PySpark DataFrames**.
- Converted raw unstructured log files into optimized structured formats, generating automated analytical visualizations using **Matplotlib** and **Seaborn**.

TECHNICAL SKILLS

Languages & DB: Python, SQL (MySQL), Data Structures Basics

Cloud & DevOps Tools: AWS (EC2, S3, RDS, CloudFront), Apache Spark (PySpark), Git, MS Office, Google Workspace

Core Competencies: Model Evaluation (RLHF), AI Data Annotation, Big Data Analysis, ETL Pipelines, RESTful Concepts

Soft Skills: Critical Thinking, Technical Documentation, Attention to Detail, Cross-Functional Teamwork

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL Certification:** Artificial Intelligence: Concepts and Techniques (Jul–Oct 2025)
- **HackerRank Skill Certifications:** SQL (Intermediate) | Python (Intermediate)

EXTRACURRICULAR ACTIVITIES

Cricket, Chess, Yoga, Badminton
